Jakarta, Indonesia

I am a Bachelor of Informatics Engineering graduate from Universitas Sriwijaya (GPA 3.92/4.00) with a strong focus on full-stack development, experienced in building and deploying 2+ production-ready web systems using PHP Laravel and PostgreSQL, successfully transforming manual processes into digital solutions and reducing administrative workload by up to 60–80%. I have designed user-friendly UI/UX with Figma and ensured 24/7 system availability through VPS deployment and custom domain configuration. My backend expertise includes developing RESTful APIs using Node.js (Hapi), implementing JWT authentication, Swagger documentation, and applying Clean Architecture and CI/CD practices on scalable AWS infrastructure. Additionally, I have delivered end-to-end digital products, including 3 Roblox games with 1.9M+ total visits and up to 7,000 peak concurrent players, demonstrating my ability to build scalable and impactful systems, supported by strong problem-solving, teamwork, and adaptability skills.

Experiences

PT. Selamat Jaya Persada - Jakarta, Indonesia

Nov 2025 - Jun 2026

IT Staff (Intern)

PT Selamat Jaya Persada (SJP) is a company engaged in coal mining and coal trading, providing coal products to meet domestic and international market needs.

- Developed and deployed 2 web-based systems (Attendance & KPI Monitoring) using PHP Laravel and PostgreSQL, supporting daily operations for internal teams.
- Successfully digitized attendance system, transitioning from manual fingerprint machines to a mobile-based system with GPS & photo verification, improving flexibility and reducing attendance fraud risk.
- Transformed manual HRIS processes (non-payroll) into a fully digital system, reducing administrative workload by an estimated 60–80% and improving data accuracy and accessibility.
- Designed intuitive UI/UX using Figma, resulting in faster user adoption and reduced training time for employees.
- Deployed applications to a VPS with custom domain configuration, ensuring 24/7 system availability and accessibility across locations.
- Managed version control and collaboration using GitHub, improving development efficiency and code maintainability.

Ween Studios - Bengkulu, Indonesia

Aug 2025 - Sekarang

Roblox Game Developer (Self Employed)

- Developed three original Roblox games as a solo developer, managing the entire development process including concept design, scripting (Lua), UI/UX, 3D environment design, testing, and deployment.
- Successfully achieved significant milestones: the first game reached 200K+ visits (200+ average daily players, peak 500), the second 250K+ visits (300+ average daily players, peak 1,500), and the third surpassed 1.5M+ visits (500+ average daily players, peak 7,000).
- Implemented gamepasses, monetization systems, and leaderboards in accordance with Roblox API standards.
- Optimized game performance and user experience through testing, debugging, and performance tuning.
- Continuously improved gameplay by analyzing player feedback, updating content, and maintaining player engagement.

Pendidikan

Universitas Sriwijaya - South Sumatera, Indonesia

Aug 2021 - Feb 2025

Bachelor of Informatics Engineering, 3.92/4.00

- Actively participate in more than 14+ campus events, such as webinars and skills training workshops

AWS Back-End Academy 2025 - Remote

May 2025 - Dec 2025

Certificate in Back-End Developer Expert Decoding

- Built RESTful APIs using Node.js (Hapi) across multiple back-end projects.
- Implemented JWT-based authentication, API documentation using Swagger, data validation with Joi, and clean, well-documented code following Clean Architecture principles.
- Performed manual and automated API testing using Postman and applied CI/CD practices to maintain code quality and reliability.
- Designed scalable and secure cloud architectures using AWS (EC2, RDS, S3, ElastiCache, Amazon MQ) with high availability, load balancing, and auto scaling.
- Utilized efficient data structures and applied OOP, Functional Programming, and asynchronous JavaScript patterns.

Bangkit Academy by Google, GoTo, Traveloka - Remote

Aug 2023 - Jan 2024

Certificate in Mobile Developer Cohort

- Develop our app for our team capstone project.
- Know various approaches to testing applications, both unit testing using Test Double, and UI testing using Idling Resource.
- Retrieve and search for web API data in JSON format and parse it.

- Proven expertise in Android app development, including background threading, networking, architecture components, and testing.
- Learn soft skills such as Growth Mindset and Power of Feedback, Time Management, Critical Thinking and Problem Solving, Adaptability and Resilience, Project Management, Professional Communication and Networking, Professional Branding and Interview Communication and English.

Pengalaman organisasi

BEM KM FASILKOM UNSRI - South Sumatera, Indonesia

Feb 2022 - Dec 2022

Medinfo Staff - Multimedia

- Cooperate with other staff in providing informative and interesting information through BEM KM Fasilkom Unsri social media. Also be in charge of design in several events held by BEM KM Fasilkom Unsri.

Google Developer Student Club Sriwijaya University - Palembang, Indonesia

Nov 2021 - Nov 2022

Member Mobile Development

- Contributed as Mobile Development Team Member.
- Developed mobile applications using Flutter Framework with Firebase backend.

Keterampilan, Prestasi & pengalaman lain

- **Soft Skills:** Leadership, Teamwork, Analysis, Time Management, Communication, Planning & Organizing, Creative, Problem Solving
- **Hard Skills:** Java, PHP, Laravel, HTML, CSS, Javascript, Node JS, Express JS, Hapi JS, Postman, Kotlin, Python, Figma, MySQL, Github, Android Studio, etc.
- **Languages:** Fluent in Indonesia; Intermediate in English, Elementary proficiency in Chinese.
- **Projects & Portofolio** 📁: Please find my project portfolio at: <https://shorturl.at/K6AbE>
